[3com Baseline Switch 2250 Plus Software 41](#)

Enterprise-class, Layer 2 10/100 switch for small and medium businesses, with advanced features for network control and flexibility

OVERVIEW

The “smart” 3Com® Baseline Switch 2250 Plus is a web-managed Layer 2 10/100 Ethernet switch that delivers enterprise-class features, customized and priced for small- and mid-sized organizations. With an easy-to-use switch interface and advanced features (VLANs, IEEE 802.1X authentication and Rapid Spanning Tree), forty-eight 10/100 ports and two dual-purpose Gigabit ports, the Baseline Switch 2250 Plus is the most cost-effective way to provide a managed network.

KEY BENEFITS

LAYER 2 SWITCHING WITH ADVANCED FEATURES

The Baseline Switch 2250 Plus has forty-eight 10/100 ports and two dual-purpose Gigabit ports (copper or SFP-based fiber) to connect to high-performance computers, servers, or core network backbones.

The switch provides non-blocking performance—all ports perform at wirespeed which helps to eliminate network traffic bottlenecks. Manual link aggregation allows ports to be grouped together to form an ultra-high-bandwidth connection that greatly expands bandwidth capacity to the network backbone.

This “smart” switch has the features that help build a voice ready network, with support for auto-voice VLAN, SNMP-based management, IGMP snooping and query and IEEE 802.1X for strengthening security.

The Baseline Switch 2250 Plus also supports Spanning Tree and Rapid Spanning Tree, traffic prioritization, priority queuing and VLANs. These switching features ensure optimal use of available bandwidth as traffic flow is directed according to the needs of the business.

NO SWITCH SETUP REQUIRED

This Baseline Plus switch is operational straight out-of-the-box; as long as default settings are acceptable, there is no need to configure the switch. If desired, the switch can be configured using a web browser or SNMP management software.

SMART BROWSER-BASED USER INTERFACE

For networks that require more control, the switch management interface—completely redesigned to enhance usability—allows even novice users to quickly and confidently configure the switch during initial setup or normal operation.

In addition, the web interface features individual port-traffic monitoring (port mirroring) and a unique, quick-glance switch status review. A cable diagnostic tool lets users troubleshoot basic connectivity problems via the web management interface further simplifying network installation.
